STAR 7028

PUMPKIN

Type	A hybrid grey pumpkin with a vining growth habit.
Maturity	Early maturity, 85 days in summer, 95-100 days in cool winters.
Plant Characteristics	An extremely early maturing plant with a vining growth habit. Can be planted at 7000 plants/ha.
Fruit Characteristics	Average fruit size of 5kg, deep shape with slight ribbing. Skin is thin with only a small green layer between skin and flesh. Medium size seed cavity and small blossom end scar. Flesh is deep orange, thick and very firm, with excellent keeping quality. Fruit should only be harvested once the stems develop cork-like cracks and lose their green colour. Can be stored.
Yield Potential	Very high
Disease Resistance	Intermediate resistance to ZYMV.
