SEEDS OF SUCCESS

*SEDA MELON

Type	A hybrid Piel de Sapo melon with long shelf life.
Maturity	Main season 85 - 90 days
Plant Characteristics	A vigorous plant with a healthy leaf cover that protects the fruit against sunburn.
Fruit Characteristics	Large to extra-large sized fruit with weight of 2.4 – 3.5kg. Harvest indicators include a change in rind colour from dark green to a mid-green/yellow mottled appearance, and the development of thin corky lines on the skin. The fruit have very crisp, white flesh, with good flavour and high brix development.
Disease Resistance	High Resistance: Fusarium (Fom) 0, 1 Intermediate Resistance: Powdery Mildew (Px) 1, 2
Climate	Optimum germination temperature: 25°C to 28°C, night temperature not lower than 18°C. Optimum growth temperatures at night are 18 - 20°C, and day 24 - 30°C, and for ripening 15 - 25°C.
Plant spacing	8,000 to 16,000 plants per ha
Adaptation	SEDA is recommended for early, mid and late season production.
Yield Potential	High yield potential.
Features and Benefits	SEDA produces large to extra-large fruit with a unique green/yellow mottled appearance, and excellent post-harvest shelf life. The fruit have very crisp, white flesh, with good flavour and high brix development, and is suitable for fresh-cut and the fresh market.

* Submitted for registration on the national variety list.
