SEEDS OF SUCCESS

*TARAY CUCUMBER

Type	Long greenhouse english type.
Plant Characteristics	TARAY is very vigorous with an open growth habit. High P levels and controlled irrigation early in the plant life, aid in encouraging healthy strong root formation. It is recommended that the head of the plant is not pruned until the laterals have a length of 20 - 30 cm.
Fruit Characteristics	The fruit of TARAY are cylindrical, dark green and slightly ribbed, with no necks. The majority of the fruit are between 33cm and 38cm long. The fruit size and quality is very uniform on the main stem and laterals, as well as through the plant life cycle.
Diseases Resistance	High Resistance: CVYV (Cucumber Vein Yellowing Virus). Intermediate Resistance: CYSDV (Cucumber Yellow Stunt Disorder Virus); PM (Powdery Mildew).
Adaptation	TARAY is suited for spring and summer plantings. Adaptable to bio-farming / sustainable farming practices.
Yield Potential	Very high yield potential.
Plant Spacing	20,000 to 22,000 plants per ha.
Features and Benefits	Very vigorous plants, with open growth habit and improved disease resistance. Adaptable to bio-farming / sustainable farming practices. Excellent yield potential with high quality, cylindrical, slightly ribbed fruit with no neck.

* Submitted for registration on the national variety list.
